

Your Cataract Surgery Options

IS CATARACT SURGERY RIGHT FOR ME?

- Are you frustrated with your vision?
- Do you feel like your lifestyle is impaired by your vision?
- Do you have trouble seeing while driving?
- Is your vision level getting worse?

LASER ASSISTED CATARACT SURGERY

- Surgeons experience more control and flexibility, and use real-time tools for an accurate visual of what's going on inside the eye.
- The procedure is blade-free and uses laser precision to protect your vision.
- Laser Assisted Cataract Surgery and a variety of intraocular lenses may give patients even more visual freedom after cataract surgery, helping them remain active for decades.

WHAT EXACTLY IS A CATARACT?

A cataract is a clouding of the normally clear lens in your eye. Though painless, cataracts can blur your vision by restricting the amount of light that enters your eye.

In addition to hazy vision, indications of cataracts include increasing glare, poor night vision, difficulty reading small print, and a change in how your eyes perceive colors.

St. Cloud Eye Clinic

COMPREHENSIVE EYE CARE FOR OVER 80 YEARS

THE CATARACT PROCEDURE

INCISIONS

Small incisions are made to allow a tiny instrument to pass through.

REMOVING THE CATARACT

Ultrasonic waves are used to break the cataract into small pieces to be suctioned away.

INSERTING THE NEW LENS

The new lens is inserted inside the eye where the old lens once was.
